# UCF REPORT

Volume 9, Number 15

For Faculty and Staff

January 28, 1987

## House committee to visit campus

The UCF Alumni Association will join the University in hosting the Education Subcommittee of the Florida House Appropriations Committee on Wednesday and Thursday, Feb. 11 and 12. The legislators will visit Central Florida Research Park, Florida Solar Energy Center, and CEBA, and hear presentations on the Center for Research in Electro-Optics and Lasers, Institute for Simulation and Training, and other University activities.

## Regents to hear funding proposal to help upper, graduate programs

A proposal to help state universities with greater needs in upper level and graduate programs will come before the Board of Regents when it meets at Florida Atlantic University in Fort Lauderdale this Thursday and Friday.

Joan Ruffier, regent from Orlando, chairs a subcommittee charged with the responsibility of studying the equity of the 1979 formula for distributing education and general budget funds appropriated by the legislature for the nine institutions.

The present formula bases increases on existing budgets. This has been a disadvantage to new institutions that are rapidly expanding. Nor does it pro-

vide the need in upper and graduate level classes to increase the ratio of teachers to students. UCF has a rapidly expanding enrollment and serves a population that demands advanced degrees.

Ruffier said her subcommittee will present a new, simple formula that is still mission oriented for each university. Whatever policy statement the regents adopt will go to the legislature as a recommendation.

Among other proposals that will go before the regents and their staff committees, are these that are especially significant to UCF:

—The proposed increase of student

athletic fees for next fall to fund the crew team and water ski club, to establish men's and women's track teams and to continue and improve the grant-in-aid scholarships for sports other than football.

—The proposed implementation of a master of science degree in taxation.

—The proposed feasibility study of a bachelor of science degree program in sports therapy.

—Report of further data in the proposal to establish Florida's first School of Optometry. One of two proposals that came before regents in October was to establish a school at UCF in conjunction with the College of Health.

## For greater student service

## UCF and Valencia enter 'new era of cooperation'

Last week brought formal recognition of a growing common interest between the two public institutions of higher learning based in Orange County.

UCF President Trevor Colbourn on Wednesday talked to the Valencia Community College Board of Trustees, stressing "a new era of cooperation" between the two institutions. The white paper he delivered documents the new cooperative approach arrived at earlier between Colbourn and Dr. Paul C. Gianini Jr., VCC president.

He spoke of the Sept. 19, 1986 joint articulation conference held on VCC's East Campus. Administrators, faculty members and staff personnel were brought together to review current areas of cooperation, to examine common concerns and to explore new opportunities for mutual cooperation.

Colbourn related a dozen ways that the two schools are cooperating in academic and student affairs and listed more than half a hundred areas of possible cooperation in academic, student and business affairs.

In academic affairs one thrust of current effort allows students to use the library resources of the other institution. Further implementation of a common course numbering system is another. Possible future cooperative endeavors include faculty exchange programs, joint research proposals and use of UCF graduate students at VCC.

In student affairs the thrust aims at easier registration of VCC's transfer students at UCF. Much of the cooperation will be sped by coordination of computers for exchange of information.

Both institutions might realize savings through sharing in the areas of purchasing, maintenance contracts, human resources and personnel policies and training.

Planning, development and external affairs are also considered.

In conclusion, Colbourn said, "It is believed that the single most important thrust of this document will be to demonstrate clearly to the business and pro-

fessional community, as well as to local and state governmental authorities, that the higher education community has identified areas which, if supported, will improve the educational quality of each institution, and thus have a significant impact on Central Florida."

Gianini pointed out areas of space sharing. UCF's Real Estate Institute moved from the Extended Studies office on campus to Valencia's new North Center, located at 1010 N. Orlando Ave. in Winter Park (US-17-92 and Lee Rd.) in 1986.

Valencia will soon offer some of its courses at UCF's South Orlando Campus.

While the two-year community college and the full university both came into being in the 1960s to meet the needs of Central Florida's expanding population their parallel courses have recently come closer together.

Valencia has more than 12,000 degree-seeking students. Half that number, Gianini said, will seek a four-year degree and 85 percent of this group choose UCF for further study.

Admission records at UCF bear out this fact. Of more than 50 institutions tracked as feeders of transfer students VCC provides more than twice the number of any other college or university.

## Annual Credit Union luncheon on Feb. 25

Tickets to this year's annual luncheon-meeting of UCF Credit Union members Feb. 25 go on sale Monday at the CU.

Cost of the buffet-style luncheon in the Student Center auditorium is \$3.50. Starting time is 11:30 a.m.

This year, in addition to the usual door prizes and gifts from area merchants, members will hear Dr. Don Ardell, director of the campus Wellness Center, explain how to make a deal with Mother Nature by living a wellness lifestyle.

## Numbers count

Susan Boule (standing), student coordinator, and Debbie Komaniski, phonathon coordinator, are in charge of Knightline '87, the telephone sessions from Feb. 15 through March 12, when volunteers call UCF alumni seeking \$115,000 in pledges. Students and alumni will do the calling.

## Kennel Club slates annual Knights benefit on Feb. 3

Scholarship athletes at UCF will once again be the beneficiaries of community support when the Sanford-Orlando Kennel Club hosts its fifth annual UCF charity night Feb. 3 at the Longwood track.

Nearly three dozen full scholarships worth more than \$126,000 have been generated by the annual event in the past four years.

As in the past, all proceeds — admissions, concessions and betting — will be turned over to the UCF Foundation to be applied to athletic

scholarships. UCF now offers the equivalent of 87.8 full scholarships to its men and women athletes; NCAA rules allow 180 such scholarships.

The effect on UCF's athletic programs was noted by Athletic Director Gene McDowell, who expressed gratitude to Club owner Jerry Collins "for his continued support and this opportunity for additional revenue that is so essential to our programs."

The track is located on Dog Track Road, two miles north of SR 436. The first of 13 races begins at 7:30 p.m.

## GRANTS AVAILABLE

### CONSTITUTION BICENTENNIAL EDUCATIONAL GRANT PROGRAM

is soliciting grant applications for the development of instructional materials and programs on the Constitution and Bill of Rights which are designed for use by elementary or secondary school students.

Priority will be given to proposals that perpetuate coordination between institutions of higher education and local school districts to focus on strengthening the ability of elementary and secondary teachers to teach successfully the principles and the history of the Constitution, the Bill of Rights, and subsequent amendments to students. This may be through the development of instructional materials or through conferences and institutes. Instructional materials may include audio and video tapes as well as printed curricular materials. DUE: Feb. 15.

**DIVISION OF ENGINEERING SCIENCE IN CHEMICAL, BIOCHEMICAL, AND THERMAL ENGINEERING (NSF)** — The objective of the Chemical, Biochemical, and Thermal Engineering Division is to contribute to the knowledge base for a large number of industrial processes involving the transformation and transport of matter and energy. The transformation processes may be chemical, biological, physical, or a combination of these. The industrial processes involve a wide range of technological pursuits and are found in such industries as aerospace, electronics, resources, environment, petroleum, biochemical materials, food, and allied activities.

Research is supported for the development of fundamental engineering principles, process control and optimization strategies, mathematical models, and experimental techniques, with emphasis on those projects having the potential for innovation and broad application. In order to increase the likelihood of such applications, cooperative projects between university and industry groups, especially those advocating a systems approach, are encouraged.

Programs included under this section are: KINETICS AND CATALYSIS (to include Kinetics, Catalysis, Electrochemical and Photochemical Phenomena, Active Surfaces); BIOCHEMICAL AND BIOMASS ENGINEERING (to include Biochemical Engineering Fundamentals, Biomass Processing, and Food Process Engineering); MULTI-PHASE AND INTERFACIAL PHENOMENA (to include Particle and Particle System Characterization, Interfacial and Colloidal Phenomena, and Particulate Generation, Profiling, and Modification); PROCESS AND REACTION ENGINEERING (to include Process Design and Control, Macromolecular Reaction Engineering, and Interactive Processes); SEPARATION AND PURIFICATION PROCESSES (to include Separation and Purification of Materials from Dilute Solutions, Dispersions and Mixtures, Improving Selectivity of Separations, Increasing the Efficiency, Rate and Capacity of Separation Processes, and Physics and Chemistry of Bulk and Interfacial Phenomena Relevant to Separation); THERMODYNAMICS AND TRANSPORT PHENOMENA (to include Interfacial, Surface, and Fluid Microstructure Phenomena, Thermodynamic Properties, and Transport Phenomena); THERMAL SYSTEMS AND ENGINEERING (to include Combustion and High Temperature systems). DUE: No Deadline.

**SPECIAL NOTE:** Those faculty who have not been contracted concerning Handicapped Research and wish to be involved, please contact DSR as soon as possible.

For further information, please contact Bruce Furino, x2671.

## Official memoranda

**To:** All Employees  
**From:** Bill D. Morris, Acting Director,  
Environmental Health and Safety  
**Subject:** Microwave Test Equipment

The microwave radiation leak tester is being made available on loan so that any interested employee can test their personal microwave.

To reserve the tester, please call x2550.

The University is not responsible for the accuracy of this equipment.

★ ★ ★

**To:** All Faculty  
**From:** Associate Vice President L. M. Trefonas  
**Subject:** Library Research Carrels

1. Assignment of research carrels in the Library will be made by the Dean of Graduate Studies and the University Research Council. Keys will be issued at the circulation/reserve desk at the main entrance of the University Library to only those faculty members authorized in writing by the vice president.
2. Ten carrels have presently been built in the Library. A few of these have been allocated on a temporary basis to alleviate some of our space problems. At present, at least seven carrels will be available on a semester basis. These rooms must be applied for by the end of the first week of classes for that semester. An eighth room will be available upon the discretion of the Dean of Graduate Studies for up to seven days, to be used for short-term projects.
3. Preference to use any of the above carrels will be given to faculty members involved in sponsored research.
4. All rules and regulations of the Library apply to the use of the research carrels. No eating, drinking, or smoking will be permitted in any areas of the Library — these restrictions apply to the carrels. We expect faculty using these rooms to cooperate with these rules. Repeated offenses will result in re-assignment of carrel privileges.
5. All Library materials left in the research carrels must first be checked out at the circulation desk. The Library staff will retain the right to inspect any room at any time. Any Library material not properly checked out will be returned to the shelves. Repeated offenses will result in suspension of study room privileges.
6. A charge of five dollars (\$5) will be assessed to any faculty member who loses the key to the research carrel.
7. All assignments will be made to individuals involved in research only. No departments will be eligible for access to a carrel. In those carrels secured on a semester basis, the last day of testing for the semester normally will coincide with the last day for use of the room unless arrangements have been made (in writing to the Dean of Graduate Studies) for use of the room between semesters.
8. Faculty must reapply each semester for use of the room and be reevaluated on each case's individual merit. There is no guarantee the carrel will be available to an individual who qualified the previous semester.
9. Depending upon the demand, two people may be assigned to the same carrel. If that is the case, the individuals involved will be expected to work out mutually agreeable arrangements.
10. All requests for Spring semester 1987, must be received by February 11, in the Office of Dean of Graduate Studies, AD 243.

★ ★ ★

**To:** All Faculty  
**From:** Associate Vice President L. M. Trefonas  
**Subject:** Challenger Astronaut Memorial Scholarship Fund

The Office of Graduate Studies has application forms for the Challenger Astronaut Memorial Scholarship fund for Graduate Studies.

Students who anticipate majoring in the disciplines of the Challenger Crew, (electrical engineering, aeronautical/aerospace engineering, physics and education — social science and sciences only) are eligible for consideration.

Please contact the Graduate Studies Office, AD 243, for application forms. The deadline for submission of applications by students is March 1, 1987.

There will be seven \$5,000 scholarships on an annual basis.

Publication of these memoranda and announcements about University policy and procedure constitutes official notice to faculty and staff.

**To:** UCF Community  
**From:** Ruth Colquitt, Supervisor  
Telecommunications  
**Subject:** SUNCOM

In addition to the new 1986-87 State of Florida Telephone Directory, state information operators can provide you SUNCOM numbers for locations that changed numbers on Dec. 1. These operators also have the ability to cross reference old SUNCOM numbers to new numbers if you only have the old number and do not know the name of the agency you wish to call.

Several State Information Operator numbers changed. Below is the current statewide list of these numbers:

	SUNCOM	LOCAL
Statewide SUNCOM Information	278-1234	488-1234
Ft. Lauderdale-Broward Regional Service Center	453-4200	467-4200
Jacksonville-Duval Regional Service Center	826-6000	359-6000
Lakeland Regional Service Center	525-5688	680-5588
Miami-Dade Regional Service Center	452-5000	377-5000
Miami-State Office Building	473-2500	325-2500
Orlando-Orange Regional Service Center	344-6000	423-6000
Pensacola-Escambia Regional Service Center	695-8011	436-8011
St. Petersburg-State Office Building	594-2121	893-2121
Tallahassee	278-1234	488-1234
Tampa-State Office Building	571-2500	272-2500
West Palm Beach-Palm Beach Regional Service Center	252-5000	837-5000
Winter Park-State Office Building	348-6933	628-6933

**To:** All Faculty and Staff  
**From:** Tracy Balkham, Secretary  
Program & Activities Council  
**Subject:** 1987 Spring Leisure Classes

PAC has scheduled two classes as part of the 1987 Spring Leisure Class program. They are:

Photography — Tuesday, 6 p.m. - 9 p.m.

runs for six weeks, excluding March 17.

Scuba — Saturdays, 9 a.m. - 4 p.m.

also runs for six weeks.

The photography class is \$25 for students and \$30 for nonstudents. Scuba is \$60 for everyone. Please come to the Student Center Main Desk or call x2633 for more information, or to register.

**To:** All Departments  
**From:** Barry W. Davidson, Student Employment  
**Subject:** Student Assistants

Just a few reminders and updates:

1. For any of your students who are on the College Work Study Program (CWSP), the Financial Aid packets for the 1987-88 Fiscal Year are available. If these students want to continue on the CWSP program for Summer Semester as well as the upcoming Fall and Spring Semesters, they need to mail the packets by March 15, 1987. We suggest they complete the packets and have them mailed by the end of January.

2. As you are aware, the Tax Reform Act of 1986 made many changes to the tax law that could affect taxes for 1984. Please note:

A. that even though we are requesting new W-4 cards for all students who want to update their exempt status for 1987 by Jan. 23, most students will no longer fall into the exempt category due to:

- a. He/she is to be claimed as a dependent on another person's tax return.
- b. He/she expects wages plus nonwages to add up to more than \$500 (previously \$3200).
- c. Last year he/she did not have any Federal income tax liability.
- d. This year he/she expects to have no Federal income tax liability.

B. Per previous instructions from Personnel and Payroll, we will need updated W-4 cards from all students by October.

We appreciate your continued assistance and cooperation.

JOHN BIEGEL

## Research in simulation-based training gets UCF a \$350,000 high tech grant

UCF's College of Engineering has received a \$350,000 grant that opens the way for multi-year, multi-million dollar grants to develop a high-tech simulation based training system to increase the productivity of the teaching-learning process.

The project is funded by the Florida High Technology and Industry Council and coordinated through the Institute for Simulation and Training.

The initial grant covers expenses between January and October of 1987, according to Dr. John E. Biegel, project director. He said a five-year budget proposal is anticipated which would run into millions of dollars, with the likelihood other funding agencies would provide grants for further training programs in other fields.

Biegel, a professor in the Industrial Engineering and Management Systems Department, began 15 months ago to put together a grant proposal that in its final form includes Embry-Riddle Aeronautical University and General Electric's Simulation and Control Systems Department as partners with UCF.

UCF, Embry-Riddle and GE will demonstrate a prototype system in the ERAU Airways Science Simulation Laboratory at Daytona Beach. The simulation trainer will include some simplified elements of the national airspace system.

Embry-Riddle has a separate half million dollar grant from the Federal Aviation Agency to create the Airways Science Simulation Laboratory in the former UCF/Daytona Campus building. Occupied by the University since 1968, the building was vacated this month upon completion of a new and much bigger building on the Daytona Beach Community College campus.

The old building and 20 acres surrounding it that belonged to UCF have been set aside by legislative act that created the Daytona Beach Applied Research Center and named UCF, ERAU, DBCC, Bethune-Cookman College and Stetson University as a consortium to use the center while utilizing the facilities of business, industry and government. UCF is named the coordinator to establish the consortium and to further the establishment of the premises as an area for applied science.

This project just starting commits five of the 20 acres under a 10-year sublease. Embry-Riddle, with its campus adjoining the center, is conveniently located to set up the demonstration laboratory.

Biegel said the initial research will develop models in the context of the National Airways System to produce an intelligent simulation system. The demonstration model will involve weather,

pilots, air traffic controllers, aircraft, equipment avionics, maintenance and airport facilities.

"Simply put," said Bill Swart, chairman of UCF's IEMS Department, "This particular project will develop a prototype intelligent training system within a use of high national priority. Everybody understands and sees the need for improving the training of workers responsible for the safety of the flying public."

"Beyond that, we see a lot of other potential uses of computers taught some of the functions traditionally in the realm of human instructors. In some ways the computer is more effective in teaching because the student controls speed of learning."

"The prototype intelligent tutor will be made available to selected high schools through OPERATION CARE, administered by UCF."

Dr. Swart continued, "Intelligent tutoring systems have applications in all aspects of military, industrial and commercial training and in schools at all levels. The research we are undertaking should contribute to the economic and technological expansion of the simulation industry in Florida."

"The Florida High Technology and Industry Council grant means four faculty members and four graduate students will have significant research work ahead of them. As the project gets moving Biegel expects six faculty members and a dozen students to be involved."

Faculty already named to the project include Drs. Gary Whitehouse and Chin Lee of IEMS, and Avelino Gonzalez, Computer Engineering.

Swart noted that this new project fits into the pattern of his efforts to involve his faculty in actual problems with industry, while at the same time providing outlets for students making the transition from the theory of the class to the practical needs of industry.

## Sinkhole Institute meeting draws 200 world scientists

Orlando and Guilin, its sister city in Guangxi Province, China, have more in common than mutual admiration. Both are perched atop porous limestone, prime territory for sinkholes.

The situation in Guilin will be covered by a resident expert Feb. 10 during a 3-day conference presented by the Florida Sinkhole Research Institute, headquartered at UCF.

Dr. Yuan Daoxian, director of the Institute of Karst (limestone) geology in Guilin, and conference keynoter, will be joined by nearly 200 scientists and other specialists for the second such conference conducted by the local institute.

One feature of the gathering will be a pre-meeting field trip Feb. 7-8 along

Florida's West Coast karst areas, to include demonstrations of ground penetrating radar and electromagnetic induction to locate and monitor potential sinkholes. The conference dates are Feb. 9-11 at the International Inn, Orlando.

Scheduled to participate in the conference, in addition to representatives from U.S. agencies, universities, and corporations, are researchers from as far away as South Africa, Spain, Greece, Great Britain, Yugoslavia and Jamaica.

The Florida Sinkhole Institute was established in 1983 to centralize and coordinate technical data and information on sinkholes. Continuing research is conducted into the causes, locations, engineering and repair of sinkholes. Dr. Barry F. Beck is director of the institute, which is funded primarily by research grants and contributions.

## College classes go to Fashion Square

Shoppers at Orlando Fashion Square have been able to rest their feet and exercise their minds at a series of free noon-time mall lectures by UCF faculty members and administrators each weekday since Jan. 20.

The program, presented as a community service by the mall management, runs Monday through Friday from 11:30 a.m. to 1:30 p.m. in the mall Community Room.

There are two one-hour presentations each lunch period. Topics range from the new tax law to exercise for the elderly.

The January offerings will be followed the first week of February by college-level credit courses in personal finance, psychology and cinema survey. They will be conducted in Robinson's Community Room. The service is offered through the UCF College of Extended Studies.

## Library expert to talk at UCF

A distinguished professor of Library and Information Science, Dr. David Kaser of Indiana University, will be the guest speaker at UCF on Feb. 11.

Annie Marie Allison, director of Libraries, has invited the University community to hear Kaser, author of 14 books and more than 200 papers, a consultant and lecturer who has been involved in the planning of more than 100 college and university library buildings in North America, Asia, Africa and the Middle East.

The talk will be given in Student Center Auditorium at 1 p.m.

## Show producers

For the upcoming 4th Miss UCF Scholarship Pageant brains and beauty got together to produce more of the same. Left to right, Susan Meta, executive producer; Charysse Wiley, student director, and Michelle Bowen, contestant director. Competition begins at 7:30 p.m. this Friday in the Student Center Auditorium in interview, talent, evening gown and swim suit events for 13 student contestants. A coronation ball follows.

## First scholarships

Willard E. Wisler, administrator of Winter Park Memorial Hospital, congratulates three UCF seniors chosen to be recipients of the first financial aid from the hospital to help worthy students in the College of Health complete the nursing program. Future nurses, from left, Carmal Lodge, Holly Freeman and Anne Thrasher.

## Peoples

**Richard M. Scott** (director/Business Services) had an article published in the October/November issue of *The College Store Journal*, entitled "Leasing the College Store: The Auxiliary Director's Perspective."

**Gary Wolf** (professor/Music) appeared in a solo piano recital in the Autumn Cultural Exchange Program in Merida, Yucatan, Mexico. The recital was under the joint sponsorship of the Institute of Culture, the Consulate of the United States and the Benjamin Franklin Institute of Yucatan.

**James L. Koevenig** (professor/Biology) has been elected first vice president of the Florida Watercolor Society. Also, he won best of show at the 16th annual Citrus County Festival of the Arts and has a painting accepted for the 1987 National Watercolor Society annual exhibition.

**Moshe Pelli** (director/Judaic Studies) read a paper, "The Literary Genre of the Autobiography in Hebrew Enlightenment Literature", at the National Association of Professors of Hebrew conference and the Society of Biblical Literature at Atlanta in November. He published an abstract of the paper for the American Academy of Religion-Society of Biblical Literature annual meeting in 1986. He also published an article on Moses Mendelssohn in the *Zionist Record and South African Jewish Chronicle*, July 25, Aug. 29, 1986.

**Kathy S. Cook** (assistant professor/Public Services) and **Charles Unkovic** (professor/Sociology) were directors and speakers at an Edgewood Ranch conference in November. **Stephen Levensohn** (professor/Humanities) was a speaker and **William Allen** (professor/Sociology) a panel moderator of the conference labeled "Status Offenders and Runaways — An Interdisciplinary Approach."

**M. Elliot Vittes** (assistant professor/Political Science) presented a paper, "Intergovernmental Aspects of Environmental Policy: Acid Rain and Contemporary Federalism," at the Southern Political Science Association in Atlanta in November.

**David B. Slaughter** (assistant professor/Public Service Administration) was a guest speaker for two law awareness classes at Edgewater High School Dec. 11. The topic was search and seizure.

**John A. Crocitto** (assistant professor/Educational Services), **Beth Barnes Crocitto** (assistant professor/English) and **Allan Etzkin** (Seminole schools) presented "Teacher Stress: A Rational View" at the Florida Association for Counseling and Development in Miami in November. John Crocitto also presented "Suicide: Identification and Intervention."

**Hassan N. Srinidhi** (assistant professor/Computer Science) presented a paper, "A Network Technique to Achieve Program and Data Security with Nominal Communications Overhead", at the Fall Joint Computer Conference in Dallas. The paper was co-authored by two others in the department, **James R. Driscoll**, associate professor, and **Tammy S. Chesser**, graduate student.

**George E. Stevens** (associate professor/Management) had his article, "Exploding the Myths about Hiring the Handicapped", appear in the December issue of *Personnel*.

**John C. Whitney** (assistant professor/Music) placed in the top 15 among 85 conductors competing in examinations at a Conductor's Workshop at Juilliard School of Music, New York, in December. American Symphony Orchestra League was the sponsor.

**Library Director Anne Marie Allison** is the author of an article "Ethics — Yes. Enforcement — No — Or Maybe." It appeared in the January 1987 issue of *Library Administration and Management*.

**Pete Fisher** (associate director/Counseling and Testing Center) and **Ellen Boves**, counselor, attended the Third International Congress on Ericksonian Approaches to Hypnosis and Psychotherapy, in Phoenix.

## WELCOME NEWCOMERS!

**Lila C. MacArthur** (cashier/Bookstore) last worked for Health and Rehabilitative Services. Born in Minnesota, she attended the University of Maryland and now lives at Oviedo with husband, Mac. They have two grown daughters, Leila, and Freda. Gardening and quilting are her hobbies.

**Stacy Martin** (electronics tech II/Engineering R&D) worked for Harris Semiconductor. A native of Rockford, Ill., he lives at Orlando with wife, Dora, and earned an AA degree from Valencia CC. He likes rock climbing, water skiing and other water sports.

**P. Angela Broughton** (clerk typist specialist/Library) previously worked for the Orange County Library System. She was born at Huntington, W. Va., and has attended Ohio University-Lancaster, Okaloosa-Walton Junior College, and Valencia CC. Her hobby is latch hooking rugs.

**Patricia J. Smith** (word processor/Statistics and Public Services Administration) was born in Kempton, Germany. She and husband, David, have a son, Bryan, 10, and live at Winter Park. She attended Orlando Junior College and her hobby is crafts.

**Jack Brainard** (radio/TV engineering/tech/South Orlando Campus) worked for Columbia Data Products and Tektronix. He was born at Pennyan, N.Y., and lives at Orlando with his wife and children, Lanie Lei, 10, and Jeshua, 6. Computers and the Bible story are his special interests.

**Michael Georgiopoulos** (assistant professor/Electrical Engineering) is a native of Athens, Greece, and earned his first degree at the National Technical University of Athens. He earned his next two degrees at the U. of Connecticut. He and his wife, Elizabeth, now live at Orlando.

**David T. Corey** (scientist II/Biology) received his bachelor's degree in science from UCF and worked last for Davgar Rest. Group. He is a native of Saratoga Springs, N.Y., and lives at Orlando.

## Shuttle pilot to address minorities

Astronaut Charles Bolden will be among speakers from around the nation to address members of the National Association of Minority Engineering Program Administrators (NAMEPA) meeting at Walt Disney World Village Feb. 1-3.

Bolden, who will keynote the seventh annual conference of the group, will be preceded on the speaker's stand by representatives from major U.S. corporations, each of which is committed to supporting the principles of the national association.

NAMEPA was established in 1979 to join more than 80 minority engineering programs in the nation's major engineering colleges, one of which is located at UCF. A major endeavor of the group is to raise awareness of engineering as a profession among minority students, and to work with similar associations in recruiting, retention and job placement.

Bolden, a Marine colonel, was the pilot aboard the Space Shuttle Columbia, launched at Kennedy Space Center on Jan. 12, 1986. He presently is assigned technical duties with the astronaut office and is assigned as pilot for the upcoming Hubble Space Telescope mission.

## Space Commission's former director to talk at UCF Feb. 2

The former executive director of the National Commission on Space is the first of three scheduled speakers in the 1987 spring series on international space policy conducted at UCF.

The series, which is free and open to the public, will open Feb. 2 with Marcia Smith, currently with the Library of Congress, who will speak on pioneering the space frontier. Smith, who also is president of the American Astronautical Society, has authored over 60 articles and reports on space.

The program, which is presented by the UCF International Studies Center and Department of Political Science, will be held in the University Dining Room, starting at 8 p.m.

Other speakers in the spring series are Dr. Hermann Strub of the West German Ministry for Research and Technology, Feb. 17; and Ken Pederson, of NASA, on March 10.

Sponsors of the series are the UCF Foundation, Grumman, TRW, MBB/Erno, Boeing Aerospace Operations, and EG&G Florida.

Coordinator Joan Johnson-Freese may be reached at x2608.

## FREE CONCERT

Two guests will join the UCF Community Orchestra in concert Feb. 8 at the Congregation of Liberal Judaism. The 7:30 p.m. program is free and open to the public.

Spotlighted on the program will be Dr. Robert Gregg, guest conductor, Belmont College, Nashville, and Florida Symphony Orchestra cellist Larry Glazier.

The temple is located at 928 Malone Dr., Orlando.

## WORTH REPEATING

Actors are like politicians, and politicians are like actors. They both spend time each day contemplating their image. They both have a desire to be loved.

Gore Vidal

## Northeastern dean fills new position in Academic Affairs

J. Edward Neighbor, 50, has been appointed to the newly-established position of associate vice president for faculty affairs.

Now acting dean of arts and sciences at Northeastern University in Boston, Dr. Neighbor brings to UCF a distinguished career in the classroom, as a policy-maker, and as the author of more than two dozen research publications.

As a member of the faculty and later as an administrator at Northeastern since 1967, he has been responsible for plans and policies within the College of Arts and Sciences and Graduate School of Arts and Sciences.

He attended Cambridge University on a Fulbright Scholarship after graduation from Stanford University in 1957 with a physics degree. His PhD, also in physics, is from Massachusetts Institute of Technology.

Neighbor is expected to assume his new duties at UCF in mid-March, said Dr. Richard Astro, UCF provost and academic vice president.

## Advisory council takes on national survey of health

The year-old Health Advisory Council in the College of Health faces a full calendar in 1987 under the leadership of Dr. Edward H. Eliscu, Orlando radiologist.

The council, which is comprised of health care professionals in the community, was established to generally support and augment health sciences taught at the University through a variety of ways, said Ronald M. Gerughty, dean of the college.

More specifically, said Gerughty, the council under Eliscu will aim to identify "more resources -- either with funding or with people -- to support our programs."

This year, the group will undertake a comprehensive survey of health providers and consumers in order to determine manpower needs in health care in the year 2000. The survey will be the first of its kind done nationally, Gerughty said.

"The results of the survey will permit us to be more flexible in our academic programming, and to tailor our graduates to meet those needs," he added.

## IST gets \$50,000 pledge from international company

The establishment of an endowed chair in simulation and training at UCF was bolstered today by a \$50,000 pledge from a British firm's Texas-based subsidiary with world-wide markets for simulation systems.

In presenting the first of five \$10,000 checks to UCF, Rediffusion Simulation, Inc., Arlington, Texas, ratified the importance of a \$1 million endowed chair at UCF to provide educational support for an industry that is growing regionally, nationally and internationally. The gift is being applied toward the requirement of \$600,000 in privately raised funds to qualify for matching state funds of \$400,000.

A wholly-owned subsidiary of the giant BET Corporation, which is located in Sussex, England, Rediffusion produces large scale flight simulators and associated visual simulation systems for civilian and military aircraft.

On hand at UCF to present the initial contribution to UCF President Trevor

## University Club Entree Selections

Feb. 2 Mon	Spaghetti w/ Meat Sauce Seafood Quiche Open Faced Roast Beef Sandwich
Feb. 3 Tues	Chicken & Dumplings Taco Bar Pork Fried Rice
Feb. 4 Wed.	Veal Scallopini Turkey Divan Tuna Noodle Casserole
Feb. 5 Thurs.	Country Fried Steak Shrimp Chow Mein Baked Glazed Ham
Feb. 6 Fri.	Broiled Cod Filet Spanish Macaroni Carved Roast Turkey & Dressing
Feb. 9 Mon.	Turkey ala King Scalloped Ham & Potatoes BBQ Ribs
Feb. 10 Tues.	Chicken Cacciatore Beef Pepper Steak Fettucini Carbonara
Feb. 11 Wed.	Chicken Pot Pie Stuffed Peppers Open Faced Roast Beef Sandwich
Feb. 12 Thurs.	Lasagna Broccoli Quiche Beef Turnovers
Feb. 13 Fri.	Baked Turbot Filets Eggplant Parmesan Open Faced Turkey Sandwich

## Consulting center to offer stat help

A Statistical Consulting Center has been established as a joint project between the Computer Center and the Department of Statistics to provide statistical assistance to faculty, students and staff.

The center is located in CCI, room 109 B, and will operate from 10 a.m. to 3 p.m. Monday and Wednesday, 9 a.m. to 5 p.m. Tuesday and Thursday, and 10 a.m. to 4 p.m. on Friday. The consulting center will handle questions regarding experimental design, analysis of data and statistical aspects of SAS, SPSSX and BMDP mainframe packages. The campus phone number is x2461.

Faculty members with specialized analyses may be referred to the Institute of Statistics, Biology Building, Third Floor. Consulting services will be provided to off-campus individuals, government agencies and industry on a fee basis through the Institute of Statistics.

Colbourn was Rediffusion Simulation's president, David P. Crane, and David Shorrock, vice-president of the company's computer based training division, who has been named to the advisory board of UCF's Institute for Simulation and Training (IST).

Established three years ago, the IST serves the needs of private industry and governmental agencies as a clearing house for knowledge in simulation and training and as a transfer point for technology to private and public sector partners.

The Institute's knowledge bank includes computer scientists, mathematicians, human factor specialists, psychologists, instructional technologists and engineering researchers. Additionally, the IST provides the nation's only known advanced degree program in simulation systems and also offers undergraduate programs of study in key simulation and training fields.

### From Litton

Maurice K. Yeager (left), president of Litton Laser Systems, Orlando, presented a \$100,000 check to President Trevor Colbourn to assist UCF's students in physics and electro-optics through an undergraduate scholarship and a graduate fellowship. The grant qualifies for matching state funds.

## Litton gives UCF \$100,000 check

The University's commitment to support the area's growing laser and electro-optics industry with well-qualified graduates has received a \$100,000 assist.

Maurice K. Yeager, president of Litton Laser Systems, Orlando, presented a check in that amount to UCF President Trevor Colbourn. A matching \$50,000 will be contributed by the state in accordance with policy on major donors.

The grant from Litton's Charitable Foundation will be earmarked for a scholarship for a third or fourth year undergraduate and a fellowship for a graduate student, both majoring in physics or electro-optics.

"This is an opportunity to reaffirm our ties with the university and our faith in its academic programs," said Yeager. "The future of research and application in these fields lies with graduates from programs such as these."

### From Rediffusion

Rediffusion Simulation, Inc., of Texas, joined other high-tech industries in supporting an endowed chair at UCF for simulation and training with a check for \$10,000, the first payment on a \$50,000 pledge. From left, David Shorrock, vice president, and David P. Crane, president of Rediffusion, present their check to UCF President Trevor Colbourn.

## Harris gets Fulbright to go to Cyprus

Michael G. Harris, assistant professor in Electrical Engineering, has been awarded a Fulbright grant to lecture and consult at the Higher Technical Institute in Cyprus.

Dr. Harris has been with UCF for approximately eight years and is co-inventor with Dr. Robert J. Martin and Paul Godfrey of a low-cost electronic eye tracking device permitting a severely disabled person to control the functions of a computer with his eyes. He earned his Doctor of Science degree at the George Washington University.

Harris is one of approximately 2,500 Americans being sent abroad for the 1986-87 academic year under the Fulbright exchange program. Established in 1946 under legislation introduced by former Senator J. William Fulbright of Arkansas, the program is designed "to increase mutual understanding between the people of the United States and the people of other countries."

More than 150,000 persons have participated in the program since it began 40 years ago, many of them rising to positions of leadership in government, academia, the media, and the arts.

The Fulbright Program is funded and administered by the U.S. Information Agency under policy guidelines established by the Board of Foreign Scholarships, a presidentially appointed body. Financial support comes from Congressional appropriations and from the governments of 27 other nations.

### MORE VIDEO

Hours for operating the Video Shop in the campus Bookstore have been extended, Nettie Stout, manager of the Bookstore, announced. The hours now coincide with the opening and closing of the store: 8:30 to 7 on Mondays and Tuesdays; 8:30 to 5 Wednesday through Friday. The shop rents VCR boxes and movies.

## Research Park shows positive benefits to parent neighbor UCF

Central Florida Research Park can show positive benefits to its next door neighbor and parent, UCF, Patrick Vaughn, CFRP research director, told Staff Council earlier this month.

The elected board, representing the interests of the University's 800 support personnel, held its January meeting at CFRP's new offices in the Research Pavilion at the invitation of Executive Director Richard W. Tesch.

Before the council held its business session Vaughn gave members an overview of the history, present development and future plans of the park. He explained that it was created by special legislation in 1979 for the purpose of attracting industries that could especially benefit by a close association with a University like UCF.

With 327 of its 1,255 acres developed, the CFRP-UCF relationships have so far been established between 30 organizations, while seven research projects have been funded by tenants. There are six faculty contracts, plus informal consulting arrangements; 23 UCF graduates are permanent employees of nine park organizations and 40 students are in part-time positions with tenants, he said.

A pending swap of small land parcels with Orange County will provide access from the developed part of the park to

142 acres of undeveloped land on the southeast corner of the campus that CFRP has set aside for future development. Vaughn said that the reserved parcel has been enhanced by adjoining tracts of 39 and 33 acres acquired by the park in a purchase closed on Dec. 30.

The 100-bed health research facility announced earlier in January will require the extension of Discovery Drive southward toward Highway 50, Vaughn said, adding that plans call for a connection with the East-West Expressway extension by late 1989, providing a no-signal light, direct access to downtown Orlando. This is to be followed by another direct access to the Beeline Expressway and the Orlando jetport.

Benefits of the park to the University will grow, council members were told. Because the number of employees at the park is expected to increase in another year from 600 to 2,500, park officers are trying to get extra money for widening Alafaya Trail directly to six lanes, instead of stopping at four.

As the park fills and infrastructures are all installed then the park will have reduced expenses and increased revenues. UCF will benefit not only by employment and research grants, but by equipment gifts, Vaughn predicted.

UCF ARMY ROTC BATTALION GETS ITS OWN ENSIGN  
... flag designates upgraded status as a host unit

### Workshop tells how to be heard

Central Florida Personnel Association is sponsoring a one-day seminar called "Why Can't They Hear Me?" for the purpose of building interpersonal communications effectiveness. It will be held at the Langford Resort Hotel in Winter Park on Tuesday, Feb. 10, at a cost of \$95 per person.

The speaker will be the president of Corporate Management Developers, Hollywood, Fla., Dr. Jacalyn Sherriton-Barnett.

Gary Meiseles, UCF director of training and development, said UCF employees attending may qualify for \$10 off the fee, if three or more attend. His office is in Admin 395-B and the telephone extension is x2348.

## Army ROTC comes of age at UCF — now rated 'host'

Army ROTC reached "host status" at UCF on Jan. 22 with a presentation of its own "colors", presided over by Brigadier General Peter W. Lash, commander of the First ROTC Region, Fort Bragg, N.C.

The transition from extension center to independent host status will be completed this summer with appointment of a professor of military science (PMS) to lead the cadre. A sergeant major will also be added.

Lash had generous words of praise for UCF President Trevor Colbourn for supporting ROTC, for UCF and its goal of excellence, for the cadre and its cadets in their military and civic presence and added a pledge. He said, "We are committed to excellence just as this University is, and our presence on this campus publicly underlines this point."

Colbourn, introducing the general, recalled that Army ROTC appeared on campus in 1978 with six cadets and today, the UCF host unit, with cross enrolled cadets from Valencia and Seminole Community Colleges, has 140 cadets.

The significance of the new status was shown by Lash with a few statistics. In the Third Region, extending from Maine to Puerto Rico, there are cadets enrolled in 500 colleges along the Eastern Seaboard and only 113 (including UCF) have been granted host status and have their own professor of military science.

In addition to having a lieutenant

colonel PMS, the cadre will have a direct line to Fort Bragg region headquarters. Students who earn four year Army ROTC scholarships may now attend UCF. Previously, as an extension center, the unit could accept only those with two and three year ROTC scholarships.

Quality of past training at UCF was illustrated by the general when he said, "This past summer 22 of your cadets attended advanced camp at Fort Bragg. Their exceptional performance contributed significantly to the overall performance of the ROTC detachment at Stetson University, causing that detachment to end up third out of 111 similar host institutions."

"ROTC training" he said, "is designed to be exciting, challenging and tough. Earning a commission as a second lieutenant in the U.S. Army is no easy task. Before gold bars are pinned on, each individual must prove he or she has the right stuff to lead our nation's most precious resources, young men and women who proudly call themselves soldiers."

The flag of the Fighting Knights Battalion has a black and gold emblem on a white field, a striking ensign unveiled by cadets in full dress, carrying the national flag and other parade emblems.

Lt. Col. James W. Tarleton III, the PMS resident at Stetson, will continue in charge of the UCF battalion until this summer when UCF gets its first resident PMS.

### FREE LECTURE

Dr. Federico Gil, Kennan professor of political science and director of the Latin American Institute at the University of North Carolina, will present a public lecture on "The Latin American Policy of The United States" on Thursday, Jan. 29, at 8 p.m. in the Music Rehearsal Hall. The program is free and open to the public.

### IN CONCERT

Flutist Susan McQuinn and pianist Kay Crawford will present a faculty artist recital at 8 p.m. Feb. 1 at the Music Rehearsal Hall. The \$3 admission will go to the music scholarship fund at the University.

### WUCF-FM seeks stronger signal

WUCF-FM expects April approval on a petition to the Federal Communications Commission for expanded power to reach thousands of new listeners who are unable to receive a clear signal from the station.

With a power boost from its present 9,000 watts to 100,000 watts the station will reach a listening audience that extends east to Titusville and northwest to Mount Dora in an elliptical pattern.

"The added power will increase our audience by 45 percent," said Keith Fowles, UCF director of broadcast operations.

## Official memoranda

Publication of these memoranda and announcements about University policy and procedure constitutes official notice to faculty and staff.

**To:** All Faculty and Staff  
**From:** Pat Bryant, Maintenance Service Superintendent  
Building Services Department  
**Subject:** Employee Rotation

Once again it is that time of year for rotation of all Building Services employees, starting Monday, Feb. 2. The purpose of rotation is to balance out the workload and familiarize our staff with all areas on campus.

New faces will be in your area, so your cooperation and patience will be appreciated. We are all working for a cleaner and better environment here at UCF.

★ ★ ★

**To:** All Personnel  
**From:** Dr. Robert Arnold  
Director  
**Subject:** Hours for University Learning Center

Spring Semester the University Learning Center will be open the following hours:

Monday	8:00 a.m. - 4:30 p.m.
Tuesday	8:00 a.m. - 9:00 p.m.
Wednesday	8:00 a.m. - 9:00 p.m.
Thursday	8:00 a.m. - 4:30 p.m.
Friday	8:00 a.m. - 4:30 p.m.

★ ★ ★

**To:** All Faculty  
**From:** I.E. Knight, Director  
Records and Registration  
**Subject:** Final Class Rolls

The Final Class Roll is the result of course and section selections made by students during Registration and Late Registration and changes made during the Add/Drop period.

If a student's name does not appear on the Final Class Roll, (s)he is not registered for the class. (S)HE MUST REPORT TO THE REGISTRAR'S OFFICE AT ONCE!

Students may appear on this roll, but later be dropped for non-payment of fees and not appear on your Final GRADE Roll.

Please report the name and social security number of any student who has never attended a class section to the Registrar's Office at once. Efforts will be made to contact this student before the end of the fifth week, as (s)he may wish to withdraw from the class.

A student must report a change of name in person to the Registrar's Office.

Your Final Class Roll should be correct! Possible changes appearing on your Final GRADE Roll should contain those students who withdrew up to and including Feb. 27, 1987

and those students who were dropped for non-payment of fees.

Each student's name must remain on your Final Class Roll if (s)he did not drop during the Add/Drop period, which ended Jan. 8, 1987.

**To:** All Nine Month Faculty  
**From:** Deborah H. Evans, Benefits Manager  
Personnel Services  
**Subject:** Advance Premium Payment for Summer Months

In order for advance premium payments to be payroll deducted for the summer months, all nine month faculty members who are enrolled in the State Health Plan, Health Maintenance Organizations, State Life Insurance, and American Dental Plan will experience double deductions on the pay periods shown below:

PAYROLL PERIOD ENDING DATE	PAY DATE	COVERAGE PERIOD
02/05/87	02/13/87	July 1987
02/19/87	02/27/87	
03/05/87	03/13/87	August 1987
03/19/87	03/27/87	
04/02/87	04/10/87	September 1987
04/16/87	04/24/87	

Normal deductions for returning employees will resume on payroll period ending 08-03-87 for October coverage.

The above schedule is in accordance with instructions received by the Bureau of State payrolls in Tallahassee.

Should you have questions contact Laurie Bailey at x2771

★ ★ ★

**To:** All USPS, A&P, T&R Employees  
**From:** Deborah H. Evans, Benefits Manager  
Personnel Services  
**Subject:** No Premium Payments

Due to the issuance of three paychecks in the month of January, no premium payment will be deducted for all Health Maintenance Organizations, State Health Plan, State Life Insurance and American Dental Plans on the paycheck you receive on Jan. 30.

Should you have any questions, please call me at x2771.

## Welcome Newcomers!

**Craig B. Emerine** (program analyst I/Computer Services) was formerly an I & R support programmer/consultant. A native of Elizabethtown, Ky., he earned his BBA in management/quantitative methods and computer systems from Memphis State University. He lives at Oviedo and for hobbies he likes scuba diving, racquetball, windsurfing, camping and flying.

**Linburgh R. Smith** (custodian/Building Services) worked for Mural Transport before joining UCF. This native of Millen, Ga., chooses fishing and football for recreation. His current address is the east side of Orlando.

**Donna Jean Holloway** (administrative secretary/Academic Affairs) is a Palatka native who has worked for the Florida Department of Corrections at Orlando, for the Division of Blind Services at Orlando and for Putnam County at Palatka. She earned an AS degree at St. Johns River Community College in data processing technologies. She and her husband, Timothy, live at Orlando and the hobbies she favors are photography, working out, sewing and reading.

**Barbara A. Huckabay** (administrative secretary/Education) decided last summer, after several visits to her relatives in Florida to make a permanent move from El Paso, Texas. Originally, she was from Forest, Ohio, and attended a school of nursing at Dayton.

She also attended Community College at El Paso and worked 11 years for the El Paso Natural Gas Co. Her husband's name is John and she has grown children, Michael, Pamela and David. She likes aerobics, walking, reading, piano, choir, swimming and country dancing.

**Arnita Louise Mango** (groundskeeper/Physical Plant) lives at Osteen and likes fishing. She came from Cairo, Ga., and her family includes Stevie, 15.

**Clyde Harrison** (officer/Police Department) was born at Jasper, Ala., lives at Winter Park, studied criminal justice at Seminole Community College

**Mark S. Hastings** (custodian/Building Services) is a native of Brattleboro, Vt., now living at Orlando, who is an Elvis collector and impersonator, who also writes songs. His wife's name is Betty and he used to work for Kmart on Goldenrod Road.

**Gloria C. Diaz** (fiscal assistant I/Finance and Accounting) comes from Hato Rey, Puerto Rico, and attended the Universidad Interamericana in Puerto

Rico. She now lives at Winter Park with husband, Luis, and sons, Luis and Jose. She likes reading, tennis and aerobics.

**Don W. Johnson** (architect/Facilities Planning) started life in Denver, earned his bachelor's degree in architecture at Louisiana State University and lives at Orlando. He has worked for Stottler Stagg & Assoc., Gee & Jensen and was incorporated as D.W. Johnson & Associates. His wife, Becky, is an interior decorator, and they have grown children, Kristine, Stacey, Jeri and Luke. He owns two race cars, holds a national competition license and has just finished designing a new race track for Sebring.

**Vicki Margaret Persons** (lab technician II/Biology) earned a BS in zoology from UCF and worked in the University's sea turtle research. She was a vet's assistant and receptionist at the Conway Animal Hospital and also has worked on the City of Orlando's water conservation program. Her husband's name is Robert and they live in Winter Park. She breeds and shows English

cocker spaniels and last year finished her first champion. She also raises orchids.

and last worked for ABC Liquors of Orlando. His family includes Cindi, plus Casey, 2, and Nathan, eight months. Motocross is his hobby.

**Juin J. Liou** (assistant professor/Electrical Engineering) was born in Taipei, Taiwan. He earned three degrees, including his Ph.D., from the University of Florida, where he was also an instructor and research assistant.

**Lorna C. Arbuckle** (clerk typist specialist/Education) worked for the University of South Florida and Kenworth of Tampa. Born at Santa Anna, Texas, she attended Westark College of Ft. Smith, Ark., and Hillsborough Community College. She has three grown children, Kathleen, Laura and Bill. Her hobbies are reading, music and travel.

**Michele J. Hastings** (programmer analyst I/Computer Services) worked for the Lee County Department of Data Processing. A native of New York City, she attended Indiana University and now lives at Winter Park. She is fluent in French, is a classical violinist and a freelance musician.

**Joan T. Reynolds** (LTA I/Library) is an overdues clerk in circulation. A native of Port Chester, N.Y., she now lives at Orlando and her last job was also at the UCF Library, but on a temporary status.

### Accountable item

UCF's Accounting Advisory Board knows how to gladden the hearts of directors and deans. Past Board Chairmen Bob Buttery (left) and Bill Cuthill (third from left) are shown presenting a copy machine to School of Accounting Director Hank Anderson (second from left) and College of Business Administration Dean Clifford Eubanks. Purchase of the equipment came from funds generated by the annual tax conferences conducted at UCF for area accountants by the advisory board. Buttery is a partner in Coopers & Lybrand and Cuthill is managing partner in Cuthill and Eddy, both Orlando CPA firms.

## Everybody's ideas welcome to help write traffic report

Got any ideas on how to improve parking on campus?

How about the flow of traffic, including bicycle and pedestrian?

Somebody wants to know your ideas, if they are constructive and will help in compiling an overall study that President Trevor Colbourn has commissioned.

The coordinator of the study is Dr. Scot Leftwich, CEBA-148. Suggestions may be sent to him by campus mail, which should be on letter-sized stationery. He requests that memos be accompanied by standard campus maps, such as may be found in the campus telephone directory, identifying the location of suggested improvements.

He asks for responses before Feb. 11. He must compile data, summarize the situation and write a report for Dr. Colbourn by April 30. The president, he said, wants professionally-thought-out solutions to pressing problems that are sure to be aggravated by continued student population growth and even faster expansion around the campus.

Leftwich was picked for this assignment because he is the resident traffic planner, having compiled similar reports for more than seven years as a transportation planning engineer for the North Carolina Department of Transportation. He teaches all the transportation classes at UCF.

For study staff he has two students,

### HOLDING AT 6

Variable Series EE U.S. Savings Bonds guarantee a minimum of six percent interest until April 1987, the Treasury Department announced. The guaranteed interest will be paid only if bonds are held to maturity. Bonds cashed after six months will pay 4.16 percent, with the rate increasing each half year until maturity at five years.

Arturo Perez, who will base his master's thesis in Civil Engineering on the study, and Antonio Mahfoud, a senior in Civil Engineering and Environmental Sciences.

The study will go beyond the campus to include apartments on Alafaya Trail where it might be practical to provide alternative ways to reach campus. Some form of shuttle is one thought, he said. Another is to encourage bicycle use by providing more parking spaces near classroom buildings.

"Although there will be some consideration for long term solutions there is a pressing need to come up with ideas for improvements that can be implemented within two years," he said.

### The UCF Report

The UCF Report is the University of Central Florida's official publication, whose purpose is to inform the University community through announcements, official memoranda and items of general interest. Publication and announcements and official memoranda about University policy and procedures in The UCF Report constitutes official notice to faculty and staff. The UCF Report is a biweekly publication, printed at a cost of \$199.72 per issue, or 6.7 cents per copy, paid for by the Office of Public Affairs, ADM 395 J. x2504

Copy submitted on or before Thursday noon of the week before publication receives handling and space priority. Copy is accepted after this deadline but is subject to editing or delay until the succeeding publication date.
